

BUILD YOUR OWN

NIKE DEUCE

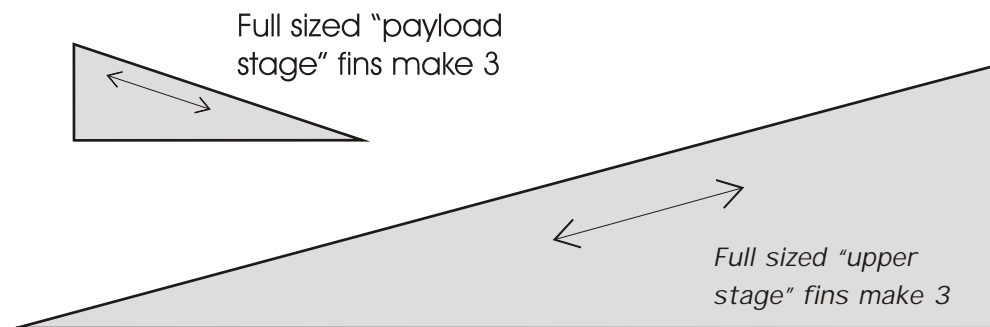

A pseudo scale conversion plan for the FLISKITS "Deuce's Wild" kit.

PARTS LIST:

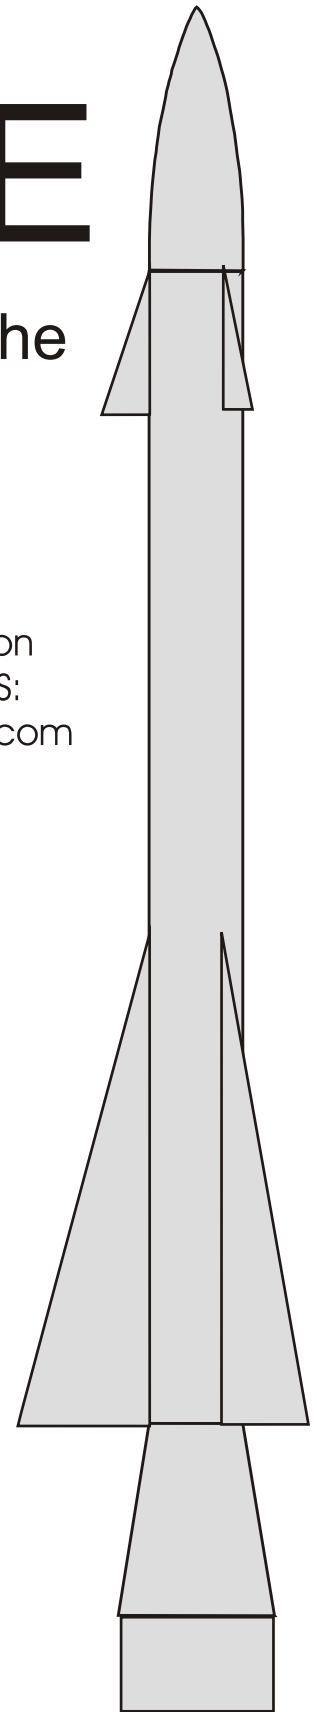

- 1) buy the Deuce's Wild kit from www.fliskits.com
- 2) Body Tube BT-20L (12" long)
- 3) Transition TA-2060
- 4) Nosecone BNC-50K
- 5) 1/16" finstock.

Nosecone and transition are available from BMS: www.balsamachining.com

Build the Deuce's Wild as per instructions, but do not add the nosecone. Instead, assemble the new nose section as per this plan. Paint this new nose section white. Paint the top 3" of the main body tube white, and the bottom part of the body tube dark green. Add military details to taste.

Despite the forward fins and the dual clustered motors, this conversion is very stable.

Above Plan is $\frac{1}{2}$ actual size.
